

Please Type or Print all information

- Page 1 of 2

13. Estimate maximum flow rate of the discharge: _____ Gal/day.
14. Attach a diagram of the proposed wastewater treatment system identifying the individual treatment units.
15. Attach a topographic or other map which indicates the receiving waterbody name, the discharge point(s), the property boundaries, as well as springs, other surface waterbodies, drinking water wells, and public water supplies, which are identified in the public record or are otherwise known to the applicant, within a 1/2 mile radius of the proposed discharge(s).
16. Are central wastewater treatment facilities available to this site? Yes _____ No _____
If "yes", has the option of discharging to the central facilities been evaluated? What was the result of that evaluation? _____

17. Does this facility currently have a permit issued by the Board? Yes _____ No _____
If yes, please provide permit number: _____
18. Pollution Complaint Number(s) (if applicable) _____
19. Is the material being treated or discharged classified as a hazardous waste under the Virginia Hazardous Waste Regulation, 9 VAC 20-60? Yes _____ No _____
20. Certification:

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system or those persons directly responsible for gathering the information, the information submitted is to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false information including the possibility of fine and imprisonment for knowing violations. I do also hereby grant duly authorized agents of the Department of Environmental Quality, upon presentation of credentials, permission to enter the property for the purpose of determining the suitability of the general permit.

**INSTRUCTIONS FOR COMPLETING THE VPDES GENERAL PERMIT
REGISTRATION STATEMENT FOR DISCHARGES FROM PETROLEUM CONTAMINATED
SITES, GROUNDWATER REMEDIATION AND HYDROSTATIC TESTS (VAG83)**

GENERAL

A Registration Statement must be submitted to the Department of Environmental Quality (DEQ) in order for DEQ to consider a proposed discharge for coverage under the VPDES General Permit for Discharges from Petroleum Contaminated Sites, Groundwater Remediation and Hydrostatic Tests (VAG83). Discharges not associated with petroleum-contaminated water, hydrostatic tests, or chlorinated hydrocarbon-contaminated water are not eligible for coverage under this general permit.

To apply for coverage, an owner must file a complete Registration Statement with the Department. Any owner proposing a new discharge must file a complete registration statement at least 30 days prior to the date planned for commencing operation of the new discharge. Any owner of an existing discharge covered by an individual VPDES permit who is proposing to be covered under this general permit must file a registration statement at least 180 days prior to the expiration date of the individual VPDES permit. Any owner of an existing discharge not currently covered by a VPDES permit who is proposing to be covered under this general permit must file a complete registration statement as soon as possible.

Items 1 and 2: FACILITY INFORMATION

Give the name of the business or other entity that occupies the site where the discharge will occur. Provide the street address or other information that will allow DEQ personnel to locate the site. Give a telephone number at the site so that DEQ can contact someone at the facility.

Item 3: OWNER INFORMATION

Provide the full name, street address and telephone numbers of the owner to whom the permit will be issued. This person, firm, public organization or other entity is the party responsible for the control of the facility's operation.

Item 4: NATURE OF BUSINESS

Give a brief statement as to what usual business activities are conducted at the site of contamination.

Item 5. PRODUCTS CAUSING THE CONTAMINATION

Provide information about the types of petroleum products or chlorinated hydrocarbons that have contaminated water at the site.

Item 6: PROPOSED ACTIVITIES

Select all of the categories that apply to this proposed discharge. If events at the facility will cause the discharge to change over time from one category to another, indicate all categories that are anticipated.

Item 7: SITE CHARACTERIZATION

For petroleum contaminated sites, please indicate if a Site Characterization Report (SCR) has been submitted to DEQ. NOTE: An SCR is required from the person responsible for conducting the release investigation and performing corrective action. If you are not the Responsible Person (RP), you are NOT required to submit an SCR.

Item 8. WASTEWATER CHARACTERIZATION

Characterize or describe the wastewater to be discharged, including the types of contaminants present in the wastewater. The characterization must include analytical data, including (but not limited to) chlorinated hydrocarbons, dissolved volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), and metals.

Item 9: DISCHARGE LOCATION

Provide a narrative description of the point of discharge (e.g., northwest corner of intersection of First St. and Second Ave.) Give the name of the stream, lake, river, etc. that the discharge will go into (e.g., Unnamed Tributary to Clear Creek). If the discharge is to enter a storm drain, give the name of the owner of the storm drain system (e.g., Fairfax Co. storm

drain inlet).

Item s 10, 11, 12 and 13: DISCHARGE INFORMATION

Provide estimates of the frequency at which the discharge will occur, the duration of the discharge and of the amount and flow rate of wastewater to be discharged.

Item 14: TREATMENT WORKS DESIGN

Attach a line drawing that traces the flow of wastewater from one treatment unit to the next. This drawing may be a sketch that shows, conceptually, what system will be used to treat wastewater so that it will meet the effluent quality requirements of the general permit. Identify all treatment technologies that will be employed at the facility.

Item 15: TOPOGRAPHIC MAP

The topographic map should be a copy of the USGS 7.5 minute quadrangle that encompasses the facility and the surrounding property for at least 1/2 mile in all directions. Maps other than the USGS quadrangle may be substituted if they provide at least the same level of detail. The required information should be clearly marked on the map. Information regarding public water supplies and private wells may be obtained from local health department officials.

Item 16: CENTRAL WASTEWATER TREATMENT SYSTEM

The owner should investigate the possibility of discharging to a central wastewater treatment system prior to requesting coverage under this general permit. If a central wastewater treatment system is in the vicinity, but access for this discharge is denied, make that statement in the space provided.

Item s 17 and 18: PERMIT/POLLUTION COMPLAINT NUMBERS

If the facility has already been permitted to discharge and has a discharge permit number, or if the facility is responsible for the release and DEQ has issued a Pollution Complaint Number for the site, fill in the appropriate blanks with the permit or pollution complaint number. In some instances the applicant should fill in both questions; in others only one question may apply.

Item 19: HAZARDOUS WASTE STATEMENT

Indicate "yes" or "no" in the blanks provided.

Item 20. CERTIFICATION

State statutes provide for severe penalties for submitting false information on this registration statement. State regulations require that the registration statement be signed as follows:

- a. For a corporation: by a responsible corporate officer. For the purpose of this section, a responsible corporate officer means: (i) A president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy- or decision-making functions for the corporation, or (ii) the manager of one or more manufacturing, production, or operating facilities, provided the manager is authorized to make management decisions that govern the operation of the regulated facility including having the explicit or implicit duty of making major capital investment recommendations, and initiating and directing other comprehensive measures to assure long-term environmental compliance with environmental laws and regulations; the manager can ensure that the necessary systems are established or actions taken to gather complete and accurate information for permit application requirements; and where authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures;
- b. For a partnership or sole proprietorship: by a general partner or the proprietor, respectively; or
- c. For a municipality, state, federal, or other public agency: by either a principal executive officer or ranking elected official.
